PAV-1 ANGLE VIEWER OPTICAL FOCAL LENGTH DETECTOR

- ➔ **Easy to Use,
Time and Cost Efficient**
- ➔ No Calculations Necessary
- ➔ Dial indicates required focal length
- ➔ Instant On-site Lens Selection
- ➔ Scale for 1/4", 1/3", 1/2", 2/3" and 1"

PENTAX

3 STEPS TO SELECTING A LENS:

- TARGET
- ADJUST
- READ

1. Target the observed object with the PAV-1 detector preferably in wide angle (for ex. 4mm)

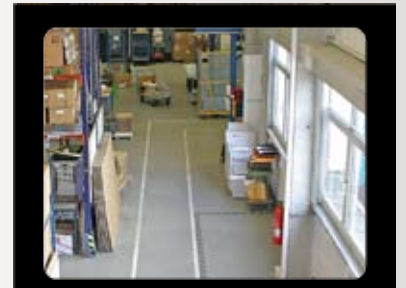

Is the image section convenient or does it need to be corrected again?

2. Turn the focal length ring till the required image section is being displayed.

You have defined the needed image section

3. Now read the focal length corresponding to the sensor size (for ex. 1/3") of your camera (here 8mm)

You did it!
You just have to select the lens matching the focal length.
